

PRODUCT INFORMATION

Advanced Staining | Autostainer Link Solution

**Dako**

Agilent Pathology Solutions

# Dako Autostainer Link. The complete IHC solution you can trust.

Agilent Technologies

# The confidence that comes with high quality

## FLEX RTU antibodies designed for Autostainer solutions

- Plug and play RTU reagents optimized for optimal performance on Dako instrumentation
- Protocol alignment to ensure optimal throughput
- Robust protocols compensate for pre-analytical variations

## FLEX RTU - trusted and proven

- Broad portfolio of high quality IVD antibodies
- Proven visualization with low complexity and very high sensitivity<sup>3</sup>
- Excellent antibody quality with 87% optimal/good staining<sup>4</sup>
- Optimized validated protocols developed in collaboration with leading experts

## Maximum versatility – the one solution to meet all your needs

- **Disease panels** – unique IVD IHC antibodies for prostate, breast and colorectal cancer and many other diagnostic needs
- **pharmDx** – an expanding portfolio of advanced companion diagnostic kits including HercepTest, ER/PR and PD-L1\*
- **IHC** – more than 200 high-quality antibodies for diagnostic use either as FLEX Ready-to-Use or concentrates
- **Visualization options** – EnVision FLEX/FLEX+, AP/Red detection, CISH, immunofluorescence and more
- **Advanced diagnostics** – including multiple staining, antibody cocktails, DuoFLEX visualization and more
- **Unlimited possibilities** – open protocols and split runs allow you to customize assays and optimize your diagnostic routine
